QA Automation Engineer / SDET building automated test systems and cloud pipelines with Python, Google Cloud, and AI agents. Connects data and services into reusable workflows with built-in validation and reporting to reduce manual work across teams and products.

EXPERIENCE

Software QA Engineer · ROI Labs Sep 2025 - Present
Full-time · Herzliya, Israel

- Built CRM campaign automation from brief-based Google Sheets preparation to Firestore inputs and dashboard-triggered Cloud Run execution.
- Combined Python/Playwright checks with Claude API review of numerical values, sanity checks, and language versions. Reduced campaign checking from **approximately two days to two hours**.
- Developed proxy-based redirect validation across multiple GEOs, brands, and devices; reduced test traffic and costs with API-based checks.
- Integrated tests with Cloud Run Jobs and Cloud Build. Built result storage and reporting with Firestore, MongoDB, Cloud Storage, and emailed reports.
- Validated CRM communications, promotion consistency, links, and multilingual campaign content.

Software QA Engineer · uTest Jun 2025 - Sep 2025
Freelance · Remote

- Performed manual and exploratory testing of applications and websites; executed test cases and documented actionable defects with screencasts and browser/Charles Proxy logs.

Supply & Tenders Coordinator · B2China Jul 2018 - Jun 2025
Self-employed · International B2B operations

- Coordinated supplier workflows, customer orders, delivery documentation, and teamwork between Russia and China.

TECHNICAL SKILLS

Testing & automation Python, Playwright, Pytest, API testing, Charles Proxy
Cloud & data GCP, Cloud Run / Jobs, Cloud Build, Firestore, Cloud Storage, MongoDB
Tools Docker, Git, Postman, Jira, Claude API, AI agents

EDUCATION & CERTIFICATIONS

Google IT Automation with Python · Google / Coursera · Jun 2026
QA Engineer Course · Technion, Israel Institute of Technology · 2024
Data Analyst Professional Training · TripleTen Israel · 2023
