Aleksandr Arkhipov

QA Automation Engineer

sinrabanse21@gmail.com | +972584221091 | LinkedIn | GitHub

QA Automation Engineer with experience in building automated test systems for web applications. Skilled in Playwright (Python), API testing, and GCP-based execution. Experienced in optimizing test performance, reducing infrastructure costs, and validating complex redirect flows.

Work Experience

QA Automation Engineer, ROI Labs (iGaming marketing startup)

Sep 2025 - Present

Developed and maintained automated UI test suites using Playwright (Python)

Designed and implemented a proxy-based testing system for validating redirects across multiple GEO locations

Built CRM campaign automation and QA with Python, Playwright, and Claude API; reduced campaign checking from approximately two days to two hours.

Reduced test traffic and execution costs by implementing API-based checks

Integrated automated tests into GCP pipelines (Cloud Run Jobs, Cloud Build)

Designed and implemented test result storage and reporting system using MongoDB and cloud storage

Performed CRM/content QA for marketing campaigns (multi-language validation, promo consistency, link validation)

QA Tester, uTest (freelance)

Jun 2025 - Sep 2025

Performed manual testing of web applications

Reported bugs with clear reproduction steps, logs, and supporting materials

Supply & Tenders Coordinator, B2China.ru (computer hardware)

Jul 2018 - Jun 2025

Coordinated logistics and documentation for international B2B operations

Technical Skills

Languages: Python, JavaScript, SQL

Automation: Playwright, Pytest

Cloud & Tools: GCP (Cloud Run, Cloud Build, Firestore, Cloud Storage), Docker, MongoDB, Git, Jira, Postman

Education and Courses

2026 - Google IT Automation with Python, Coursera

Automation with Python, scripting, debugging, Git

2024 - QA Course, Technion - Israel Institute of Technology

2023 - Data Analyst Professional Course, TripleTen Israel
